Meeting closed at 21.25pm

Thomas Foreman Town Clerk

**Date of next meetings**

Finance & Staff Monday 21 Sept 2015

Town Council 5 October 2015

Plans meeting 12 October 2015

## Public Comments.

Following a detailed presentation from the Generation Park representatives Prof. Trevor Davies, Miss Katie Hupton, Mr Simon Barnard and Mr Michael Gurney. Questions were fully answered on air pollution, traffic noise and the commercial benefits. It was confirmed that new homes and offices would be built and that enough electricity would be generated to power 88,000 homes.

It was also confirmed that-

\*Rail transport would be used to deliver straw matter to the energy generation site. This would be during the day, 1 train a day for 5 days.

\*Air pollution would be minimal due to height of the chimneys, and this would be consistently monitored.

\*The only visual changes from Thorpe St Andrew would be 1 new chimney replacing 2 pylons at present, visible from Harvey Lane.

\* The project only takes in a small piece of land in Thorpe St Andrew which is conservation area and would remain so.

\*The project would be most costly in the first phase. This is the clearing of the site, therefore there would be no question of the remained of the project not being completed once the energy centre was completed.

\* The government are providing funding, with backing from UEA.
